Introduction to Tibial Plateau Leveling Osteotomy (TPLO)

Course Introduction

The management of cruciate disease has evolved over the years and is today often managed using a combination of medical and surgical methods.

Amongst the various surgical options, one of the most popular methods currently favoured by veterinary surgical specialists worldwide is the TPLO technique, a technique which involves a combination of knowledge and finesse.

Our team at Skills Aid, in conjunction with InTrauma, is excited to present a TPLO workshop this April. Conducted by subject matter experts, our two-day workshop will allow participants to gain an in-depth understanding of the TPLO technique through lectures, and develop hands-on skills and familiarity through the practical sessions that follow.

Speakers

Dr Filippo Maria Martini, DVM, PhD

Associate Professor in Veterinary Surgery, Parma University

- Authored “Joint Diseases in Dogs and Cats”
- Senior President of the Italian Society of Veterinary Orthopaedics (SIOVET)
- Senior lecturer in Small Animal Orthopaedic (Advanced Course) at the University Federico II of Naples.
- Completed a PhD in “Orthopaedics of domestic animal”.
- Ambassador member of AOVET

Dr Filippo Lusetti, DVM, PhD

Co-Founder, ORTOVET STP SRL

- Completed surgical internship at the University of Parma
- Received further surgical training under the guidance of ACVS specialists across the United States
- Completed a PhD in “CT Study of Pelvic Limb Alignments in English Bulldogs”
- AOVET member

Course Outline

Day 1

- 0830 Registration
- 0850 Course overview
- 0900 Pathogenesis, examination and differential diagnoses
- 0930 Traditional to biomedical surgical techniques
- 1000 Isometry in extra-capsular techniques
- 1030 Tea break
- 1100 Isolock surgical technique
- 1130 TPLO X-ray examination and TPA measurement
- 1200 Meniscal tear and treatment
- 1300 Lunch
- 1430 Lab 1: X-ray TPA measurement
- 1600 Lab 2: Isolock procedure practice with bone models
- 1730 End of day wrap-up and discussion

Day 2

- 0900 Biomechanics of FIXIN plate fixation & conical coupling
- 0915 Instrumentation, implants and surgical technique
- 1000 TPLO instrumentation and FIXIN dedicated implants
- 1030 Tea break
- 1100 TPLO surgical approach and technique
- 1130 Patient selection - Isolock vs TPLO
- 1200 Complications in TPLO
- 1230 Complex TPLO clinical cases
- 1300 Lunch
- 1430 Lab 3: TPLO pre-op planning
- 1600 Lab 4: TPLO practice on bone models
- 1730 End of day wrap-up and discussion
